The Journal of Experimental Biology

EDITED BY

J. GRAY

ASSISTED BY

THE HON. SECRETARIES, SOCIETY FOR EXPERIMENTAL BIOLOGY

VOLUME XXVIII

CAMBRIDGE
AT THE UNIVERSITY PRESS
1951

U. OF I.
LIBRARY

Published for the Company of Biologists, Limited

Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press

London: Bentley House, N.W. 1
American Branch: New York

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1. MARCH 1951

PAGE

D. S. HART. Photoperiodicity in the female ferret. (With Nine Text-figures) . 1

C. A. G. WIERSMA. A bifunctional single motor axon system of a crustacean muscle. (With Four Text-figures) 13

J. A. COLIN NICOL. Giant axons and synergic contractions in *Branchiomma vesiculosum*. (With Eight Text-figures) 22

D. L. DUNCAN AND A. T. PHILLIPSON. The development of motor responses in the stomach of the foetal sheep 32

G. P. WELLS and ELINOR B. ALBRECHT. The integration of activity cycles in the behaviour of *Arenicola marina* L. (With Five Text-figures) 41

G. P. WELLS AND ELINOR B. ALBRECHT. The role of oesophageal rhythms in the behaviour of *Arenicola ecaudata* Johnston. (With Three Text-figures) . . 51

BARBARA M. WALSHE. The function of haemoglobin in relation to filter feeding in leaf-mining chironomid larvae. (With One Text-figure) 57

J. A. RAMSAY. Osmotic regulation in mosquito larvae: the role of the Malpighian tubules. (With Three Text-figures) 62

F. V. GRAY, A. F. PILGRIM AND R. A. WELLER. Fermentation in the rumen of the sheep. I. The production of volatile fatty acids and methane during the fermentation of wheaten hay and lucerne hay *in vitro* by micro-organisms from the rumen 74

F. V. GRAY AND A. F. PILGRIM. Fermentation in the rumen of the sheep. II. The production and absorption of volatile fatty acids during the fermentation of wheaten hay and lucerne hay in the rumen. (With Two Text-figures) . 83

E. B. EDNEY. The evaporation of water from woodlice and the millipede, *Glomeris*. (With Twelve Text-figures) 91

J. D. MCCOLL AND R. J. ROSSITER. Lipids of the nervous system of the squid, *Loligo pealii* 116

No. 2. JUNE 1951

J. R. G. BRADFIELD. Radiographic studies on the formation of the hen's egg shell. (With Plate 1 and Six Text-figures) 125

C. L. SMITH. The temperature-pulse rate curve of the isolated frog's heart (*Rana temporaria*). (With Eleven Text-figures) 141

J. L. CLOUDSLEY-THOMPSON. Studies in diurnal rhythms. I. Rhythmic behaviour in millipedes. (With Six Text-figures) 165

L. LEVENBOOK. The variation in fat and glycogen content of the bot fly (*Gastrophilus intestinalis*) larva tracheal organ during development. (With Two Text-figures) 173

PAGE

L. Levenbook. The effect of carbon dioxide and certain respiratory inhibitors on the respiration of larvae of the horse bot fly (*Gastrophilus intestinalis* de Geer). (With Three Text-figures) 181

J. A. Kitching. The physiology of contractile vacuoles. VII. Osmotic relations in a suctorian, with special reference to the mechanism of control of vacuolar output. (With Six Text-figures) 203

A. H. Woodcock and A. F. McBride. Wave-riding dolphins 215

S. Woldring and M. N. J. Dirken. Unit activity in the medulla oblongata of fishes. (With Plate 2 and One Text-figure) 218

M. F. M. Osborne. Aerodynamics of flapping flight with application to insects. (With Fifteen Text-figures) 221

No. 3. SEPTEMBER 1951

D. R. Newth. Experiments on the neural crest of the lamprey embryo. (With Plates 3 and 4 and Three Text-figures) 247

J. R. Erichsen Jones. The reactions of the minnow, *Phoxinus phoxinus* (L.), to solutions of phenol, ortho-cresol and para-cresol. (With Five Text-figures) . 261

E. B. Edney. The body temperature of woodlice. (With Four Text-figures) . 271

F. Segrove. Oviposition behaviour in the two strains of the rice weevil, *Calandra oryzae* Linn. (Coleopt., Curculionidae). (With Six Text-figures) . . . 281

E. G. Healey. The colour change of the minnow (*Phoxinus laevis* Ag.). I. Effects of spinal section between vertebrae 5 and 12 on the responses of the melanophores. (With Eleven Text-figures) 298

A. L. McAulay, J. M. Ford and A. B. Hope. The distribution of electromotive forces in the neighbourhood of apical meristems. (With Four Text-figures) . 320

A. M. Clark. Carbonic anhydrase activity during embryonic development. (With Five Text-figures) 332

The late Augustus Krogh and Torkel Weis-Fogh. The respiratory exchange of the desert locust (*Schistocerca gregaria*) before, during and after flight. (With Four Text-figures) 344

G. A. Garton. Observations on the distribution of inorganic phosphorus, soluble calcium and soluble magnesium in the stomach of the sheep . . . 358

R. F. Ewer. Water uptake and moulting in *Bufo regularis* Reuss. (With Two Text-figures) 369

R. F. Ewer. The effect of pitressin and pitocin on water balance in *Bufo regularis* Reuss. (With Four Text-figures) 374

R. E. Billingham and P. B. Medawar. The technique of free skin grafting in mammals. (With Plates 5–7 and One Text-figure) 385

Lord Rothschild and M. M. Swann. The fertilization reaction in the sea-urchin. The probability of a successful sperm-egg collision. (With One Text-figure) 403

No. 4. DECEMBER 1951

PAGE

M. M. Swann. Protoplasmic structure and mitosis. I. The birefringence of the metaphase spindle and asters of the living sea-urchin egg. (With Plate 8 and Nine Text-figures) 417

M. M. Swann. Protoplasmic structure and mitosis. II. The nature and cause of birefringence changes in the sea-urchin egg at anaphase. (With Plates 9 and 10 and Twelve Text-figures) 434

D. A. Parry. Factors determining the temperature of terrestrial arthropods in sunlight. (With Eight Text-figures) 445

D. B. Carlisle. On the hormonal and neural control of the release of gametes in ascidians. (With One Text-figure) 463

Margaret E. Brown. The growth of brown trout (*Salmo trutta* Linn.). IV. The effect of food and temperature on the survival of growth of fry. (With Nine Text-figures) 473

C. Ellenby. Body size in relation to oxygen consumption and pleopod beat in *Ligia oceanica* L. (With Seven Text-figures) 492

G. V. T. Matthews. The experimental investigation of navigation in homing pigeons. (With Twelve Text-figures) 508

G. Calcutt. The role of radiation in photodynamic action. (With Two Text-figures) 537

R. A. Beatty and M. Fischberg. Cell number in haploid, diploid and polyploid mouse embryos. (With One Text-figure) 541

F. R. Harden Jones. The swimbladder and the vertical movements of teleostean fishes. I. Physical factors. (With Three Text-figures) 553

Eric Ponder. Fragmentation of red cell ghosts in relation to the problem of red cell structure. (With One Text-figure) 567

Anita M. Mandl. The phases of the oestrous cycle in the adult white rat. (With Two Text-figures) 576

Anita M. Mandl. Cyclical changes in the vaginal smear of adult ovariectomized rats. (With Four Text-figures) 585

Index 593

INDEX OF SUBJECTS

A

Activity cycles:
The integration of, in the behaviour of *Arenicola marina* L. (WELLS and ALBRECHT) 41

Aerodynamics:
of flapping flight with application to insects (OSBORNE) 221

Apical meristems:
The distribution of electromotive forces in the neighbourhood of (McAULAY, FORD and HOPE) 320

Arenicola ecaudata Johnston:
The role of oesophageal rhythms in the behaviour of (WELLS and ALBRECHT) 51

Arenicola marina L.:
The integration of activity cycles in the behaviour of (WELLS and ALBRECHT) 41

Ascidians:
On the hormonal and neural control of the release of gametes in (CARLISLE) 463

Axon system:
A bifunctional single motor, of a crustacean muscle (WIERSMA) 13

Axons:
Giant, and synergic contractions in *Branchiomma vesiculosum* (NICOL) 22

B

Birefringence:
See Protoplasmic structure

Branchiomma vesiculosum:
Giant axons and synergic contractions in (NICOL) 22

Brown trout:
The growth of, (*Salmo trutta* Linn.). IV. The effect of food and temperature on the survival and growth of fry (BROWN) 473

Bufo regularis Reuss:
Water uptake and moulting in (EWER) 369
— The effect of pitressin and pitocin on water balance in (EWER) 374

C

Carbonic anhydrase activity:
during embryonic development (CLARK) 332

Chironomid larvae:
The function of haemoglobin in relation to filter feeding in leaf-mining (WALSHE) 57

Colour change:
of the minnow (*Phoxinus laevis* Ag.). I. Effects of spinal section between vertebrae 5 and 12 on the responses of the melanophores (HEALEY) 298

Contractile vacuoles:
The physiology of. VII. Osmotic relations in a suctorian, with special reference to the mechanism of control of vacuolar output (KITCHING) 203

Crustacean muscle:
See Axon system

D

Desert locust:
See Schistocerca gregaria

Diurnal rhythms:
Studies in. I. Rhythmic behaviour in millipedes (CLOUDSLEY-THOMPSON) 165

Dolphins:
Wave-riding (WOODCOCK and McBRIDE) 215

E

Electromotive forces:
The distribution of, in the neighbourhood of apical meristems (McAULAY, FORD and HOPE) 320

Embryonic development:
Carbonic anhydrase activity during (CLARK) 332
— *See also* Mouse embryos *and* Foetal sheep

Evaporation of water:
from woodlice and the millipede, *Glomeris* (EDNEY) 91

F

Fat and glycogen content:
The variation in, of the bot-fly (*Gastrophilus intestinalis*) larva tracheal organ during development (LEVENBOOK) 173

Fermentation:
in the rumen of the sheep. I. The production of volatile fatty acids and methane during the fermentation of wheaten hay and lucerne hay *in vitro* by micro-organisms from the rumen (GRAY, PILGRIM and WELLER) 74
— — II. The production and absorption of volatile fatty acids during the fermentation of wheaten hay and lucerne hay in the rumen (GRAY and PILGRIM) 83

Ferret:
Photoperiodicity in the female (HART) 1

Fertilization reaction:
in the sea-urchin. The probability of a successful sperm-egg collision (ROTHSCHILD and SWANN) 403

Filter feeding:
See Chironomid larvae

Foetal sheep:
The development of motor responses in the stomach of the (DUNCAN and PHILLIPSON) 32

Frog:
See Rana temporaria
Fry:
See Brown trout

G

Gastrophilus intestinalis de Geer:
The variation in fat and glycogen content of the bot fly larva tracheal organ during development (LEVENBOOK) 173
— The effect of carbon dioxide and certain respiratory inhibitors on the respiration of larvae of the horse bot fly (LEVENBOOK) 181
Glomeris:
See Evaporation of water

H

Haemoglobin:
The function of, in relation to filter feeding in leaf-mining chironomid larvae (WALSHE) 57
Hen's egg shell:
Radiographic studies on the formation of the (BRADFIELD) 125
Homing pigeons:
The experimental investigation of navigation in (MATTHEWS) 508
Hormonal and neural control:
On the, of the release of gametes in ascidians (CARLISLE) 463

I

Inorganic phosphorus:
See Sheep
Insects:
Aerodynamics of flapping flight with application to (OSBORNE) 221

L

Lamprey embryo:
Experiments on the neural crest of the (NEWTH) 247
Ligia oceanica L.:
Body size in relation to oxygen consumption and pleopod beat in (ELLENBY) 492
Lipids:
of the nervous system of the squid, *Loligo pealii* (MCCOLL and ROSSITER) 116
Loligo pealii:
Lipids of the nervous system of the squid (MCCOLL and ROSSITER) 116

M

Malpighian tubules:
See Osmotic regulation
Medulla oblongata:
Unit activity in the, of fishes (WOLDRING and DIRKEN) 218
Melanophores:
See Colour change
Micro-organisms:
See Fermentation
Millipede:
See Evaporation of water *and* Diurnal rhythms
Minnow:
See Phoxinus phoxinus (L.) *and P. laevis* Ag.
Mitosis:
See Protoplasmic structure
Mosquito larvae:
Osmotic regulation in: the role of the Malpighian tubules (RAMSAY) 62
Motor responses:
The development of, in the stomach of the foetal sheep (DUNCAN and PHILLIPSON) 32
Moulting:
See Bufo regularis Reuss
Mouse embryos:
Cell number in haploid, diploid and polyploid (BEATTY and FISCHBERG) 541

N

Navigation:
The experimental investigation of, in homing pigeons (MATTHEWS) 508
Neural crest:
Experiments on the, of the lamprey embryo (NEWTH) 247

O

Oesophageal rhythms:
The role of, in the behaviour of *Arenicola ecaudata* Johnston (WELLS and ALBRECHT) 51
Oestrous cycle:
The phases of the, in the adult white rat (MANDL) 576
Osmotic regulation:
in mosquito larvae: the role of the Malpighian tubules (RAMSAY) 62
Osmotic relations:
See Contractile vacuoles
Ovariectomized rats:
Cyclical changes in the vaginal smear of adult (MANDL) 585

P

Photodynamic action:
The role of radiation in (CALCUTT) 537
Photoperiodicity:
in the female ferret (HART) 1
Phoxinus laevis Ag.:
The colour change of the minnow. I. Effects of spinal section between vertebrae 5 and 12 on the responses of the melanophores (HEALEY) 298
Phoxinus phoxinus (L.):
The reactions of the minnow, to solutions of phenol, ortho-cresol and para-cresol (JONES) 261

Protoplasmic structure:
and mitosis. I. The birefringence of the metaphase spindle and asters of the living sea-urchin egg (SWANN) 417
—— II. The nature and cause of birefringence changes in the sea-urchin egg at anaphase (SWANN) 434

R

Radiation:
The role of, in photodynamic action (CALCUTT) 537
Rana temporaria:
The temperature-pulse rate curve of the isolated frog's heart (SMITH) 141
Rat:
See Oestrous cycle *and* Ovariectomized rats
Red cell structure:
Fragmentation of red cell ghosts in relation to the problem of (PONDER) 567
Release of gametes:
See Ascidians
Respiration:
The effect of carbon dioxide and certain respiratory inhibitors on the, of larvae of the horse bot fly (*Gastrophilus intestinalis* de Geer) (LEVENBOOK) 181
Respiratory exchange:
of the desert locust (*Schistocerca gregaria*) before, during and after flight (KROGH and WEIS-FOGH) 344

S

Salmo trutta Linn.:
See Brown trout
Schistocerca gregaria:
The respiratory exchange of the desert locust, before, during and after flight (KROGH and WEIS-FOGH) 344
Sea-urchin:
The fertilization reaction in the. The probability of a successful sperm-egg collision (ROTHSCHILD and SWANN) 403
Sea-urchin egg:
See Protoplasmic structure
Sheep:
Observations on the distribution of inorganic phosphorus, soluble calcium and soluble magnesium in the stomach of the (GARTON) 358
— *See also* Fermentation *and* Foetal sheep
Skin grafting:
The technique of free, in mammals (BILLINGHAM and MEDAWAR) 385
Squid:
See Loligo pealii
Suctorian:
See Contractile vacuoles
Swimbladder:
and the vertical movements of teleostean fishes. I. Physical factors (JONES) 553
Synergic contractions:
See Branchiomma vesiculosum

T

Teleostean fishes:
The swimbladder and the vertical movements of. I. Physical factors (JONES) 553
— *See also* Medulla oblongata
Temperature-pulse rate curve:
of the isolated frog's heart (*Rana temporaria*) (SMITH) 141
Terrestrial arthropods:
Factors determining the temperature of, in sunlight (PARRY) 445

V

Vacuolar output:
See Contractile vacuoles
Volatile fatty acids and methane:
See Fermentation

W

Water balance:
The effect of pitressin and pitocin on, in *Bufo regularis* Reuss (EWER) 374
Water uptake:
and moulting in *Bufo regularis* Reuss (EWER) 369
Woodlice:
See Evaporation of water
